

Streamline Asset Identification & Inventory Management

Integrated Barcode Solution

Smoothly Integrate Barcoding with MEX

Enhance the accuracy of your stock counts, reduce errors and avoid time consuming manual data entry through using the inbuilt MEX Barcoding function.

When it comes to managing maintenance, having accurate and up to date inventory numbers & asset information is absolutely crucial. Instantly pull up Assets, Work Orders, Stock Items & History, simply by scanning a barcode. Less time wasted equals less downtime and more time to focus on the things that matter - productivity!

HARDWARE REQUIRED

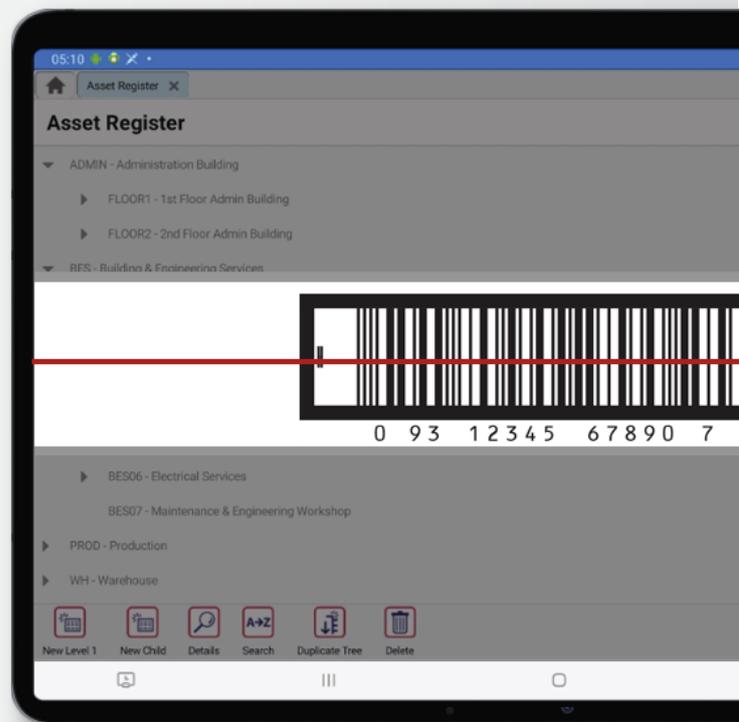

MEX App

Bluetooth Scanner

Label Printer

Benefits of Barcoding

Reduces Human Error

Barcoding with MEX reduces manual data entry that is the main cause of database errors. Information is accurately recorded resulting in optimal reporting & effective decision making.

Increased Productivity

With paperless activities, maintenance personnel spend less time gathering & entering data and focus more time on preventative tasks. This translates into maximised asset uptime.

Greater Mobility & Tracking

Barcoding with MEX makes tracking equipment & stock easier than ever. Staff can use their mobile devices to scan barcodes on parts & assets right at the work site.
